Advice No. 3315  
(U 904 G)

Public Utilities Commission of the State of California

**Subject: December 2003 Core Procurement Charge Update**

Southern California Gas Company (SoCalGas) hereby submits for filing revisions to its tariff schedules, applicable throughout its service territory, as shown on Attachment B.

This filing is made in compliance with Ordering Paragraphs 2 and 3 of Decision No. (D.) 98-07-068, dated July 23, 1998.

**Purpose**

This filing revises the listed tariff rate schedules by updating the Core Procurement Charge for residential and core commercial and industrial customers for December 2003.

**Core Procurement Charge Update**

D.98-07-068 authorizes SoCalGas to 1) change the calculation of its forecasted portfolio weighted average cost of gas using best estimates of the weighted volumes and prices of flowing supplies from the different supply basins delivered to the California/Arizona border for the purposes of calculating its Core Procurement Charge, 2) file the Core Procurement Charge tariffs on the last business day of each month to become effective on the first calendar day of the following month, and 3) establish a Core Purchased Gas Account (CPGA) imbalance band of  $\pm 1\%$  of the actual annual commodity gas purchases for the preceding 12-month period ending March 31 of each year, wherein adjustments would be made to the Core Procurement Charge only if the CPGA imbalance falls outside of such band.

For residential and core commercial and industrial customers the December 2003 Core Procurement Charge is **44.717¢** per therm, an increase of **2.144¢** per therm from last month.

**Core Subscription Procurement Charge Update**

Pursuant to D.01-12-018, as of January 1, 2002, the core subscription program has been closed to new customers. Effective December 1, 2003, SoCalGas no longer has any

remaining customers served under this program. Therefore, SoCalGas will no longer publish the core subscription rates in its tariff. A new rate (G-CPA), approved in Advice No. 3268, will be published in rate schedule G-CP to be used as an equivalent rate where the core subscription cost of gas was previously used in calculating other rates. The G-CPA rate is calculated by removing the effects of storage from the Core Procurement Charge. For December 2003 the G-CPA rate is 45.809 cents per therm.
