Advice No. 3602  
(U 904 G)

Public Utilities Commission of the State of California

**Subject: March 2006 Core Procurement Charge Update**

Southern California Gas Company (SoCalGas) hereby submits for filing revisions to its tariff schedules, applicable throughout its service territory, as shown on Attachment B.

**Purpose**

This filing is made in compliance with Ordering Paragraphs 2 and 3 of Decision No. (D.) 98-07-068, dated July 23, 1998 and revises the listed tariff rate schedules by updating the Core Procurement Charge for residential and core commercial and industrial customers for March 2006.

There is no CARE Discount for storage cushion gas withdrawal for March 2006 included in the rates filed herein. D.05-11-027 authorized SoCalGas to flow through into CARE rates the estimated benefit that results from the reclassification and transfer of storage field cushion gas at book value to CARE customers over the four-month period of December 2005 through March 2006. The CARE commodity rate without any cushion gas benefit is 53.505¢ per therm for March 2006, well below the maximum level of 80¢ per therm SoCalGas sought to achieve this winter through the use of cushion gas benefits. The Petition for Modification of D.05-11-027 filed by SoCalGas on January 12, 2006 is granted by D.06-02-034, dated February 16, 2006. As a consequence of D.06-02-034, this filing revises SoCalGas' income-qualified rate schedules to reflect that benefits from cushion gas withdrawal may be applied in order to keep the CARE commodity rate in any winter month from exceeding 80¢ per therm, provided that all benefits have been applied by March 31, 2008.

There are no benefits associated with the emergency winter Gas Hedging Plan approved in D.05-10-043 included in this month's cost of gas.

**Background**

D.98-07-068 authorizes SoCalGas to 1) change the calculation of its forecasted portfolio weighted average cost of gas using best estimates of the weighted volumes and prices of flowing supplies from the different supply basins delivered to the California/Arizona border for

the purposes of calculating its Core Procurement Charge, 2) file the Core Procurement Charge tariffs on the last business day of each month to become effective on the first calendar day of the following month, and 3) establish a Core Purchased Gas Account (CPGA) imbalance band of  $\pm 1\%$  of the actual annual commodity gas purchases for the preceding 12-month period ending March 31 of each year, wherein adjustments would be made to the Core Procurement Charge only if the CPGA imbalance falls outside of such band.

For residential and core commercial and industrial customers the March 2006 Core Procurement Charge is 66.881¢ per therm, a decrease of 6.141¢ per therm from last month. The Adjusted Core Procurement Charge (G-CPA) reported in Schedule No. G-CP, which is used as an equivalent to the previously reported Core Subscription Procurement Charge, for March 2006 is 66.680¢ per therm, a decrease of 4.196¢ per therm from last month.

### **Proposed Tariff Revisions to Income-Qualified Rate Schedules**

SoCalGas AL3556, dated November 30, 2005, added the following language to each of the income-qualified tariffs to provide a credit for CARE customers that reflects the hedging and cushion gas withdrawal benefits in addition to the existing 20% discount:

Pursuant to D.05-10-043 and D.05-11-027 additional discounts from possible hedging benefits and from cushion gas withdrawal will be applied during December 2005 through March 2006.

Ordering Paragraph 1 of D.06-02-034 states:

SoCalGas is authorized to flow through into CARE rates the estimated cushion gas benefit that will result from the rework, reclassification, and transfer at book value to CARE customers starting in December 2005. SoCalGas is authorized to flow the benefit through to CARE customers to the extent needed to keep the CARE commodity rate in any winter month from exceeding 80 cents per therm, provided that SoCalGas shall flow through all the benefit to CARE customers no later than March 31, 2008 even if CARE commodity rates would not otherwise exceed 80 cents per therm in any month before then. Pending a decision in Phase 2 of this application, SoCalGas' core shall be allowed to hold reclassified cushion gas not used by March 31, 2006 in storage inventory, in addition to the core's ability to use 70 Bcf of storage inventory capacity already allocated to it.

As a consequence of D.06-02-034, SoCalGas proposes to replace the above language in each of the income-qualified tariffs with the following:

Pursuant to D.05-11-027, as modified by D.06-02-034, benefits from cushion gas withdrawal may be applied in order to keep the CARE commodity rate in any winter month from exceeding 80 cents per therm, provided that all benefits have been applied by March 31, 2008.

APPLICABILITY

The GR rate is applicable to natural gas procurement service to individually metered residential customers.

The GR-C, cross-over rate, is a core procurement option for individually metered residential core transportation customers with annual consumption over 50,000 therms, as set forth in Special Condition 10.

The GT-R rate is applicable to Core Aggregation Transportation (CAT) service to individually metered residential customers, as set forth in Special Condition 11.

- Number of Therms: The number of therms to be billed shall be determined in accordance with Rule No. 2.
- Required Contract: As a condition precedent to service under this schedule, an executed NGV Home Refueling Authorization Agreement (Form 6150) shall be required. As part of the Agreement, the customer certifies that he qualifies under the terms and conditions of this schedule.
- CPUC Oversight: All contracts, rates, and conditions are subject to revision and modification as a result of CPUC order.
- CARB Fuel Regulations: Due to California Air Resources Board (CARB) fuel specification regulations, the Utility may not be able to provide natural gas for motor vehicle refueling in some areas of its service territory. Therefore customers intending to provide or use natural gas as a motor vehicle fuel must inform and obtain written approval from the Utility prior to such provision or use. The Utility will determine which areas of its service territory can satisfy CARB fuel regulations for the provision of NGV service and whether the Utility can provide natural gas for this purpose.
