Advice No. 3757
(U 904 G)

Public Utilities Commission of the State of California

Subject: Publication of Open Season Results for the Rainbow Corridor

Southern California Gas Company ("SoCalGas") hereby submits for filing with the California Public Utilities Commission ("Commission") this publication of the results of the Open Season held for firm service contracts commencing or renewing after May 31, 2007 for customers served off the Rainbow Corridor, which consists of Line 1027 (16-inch diameter), Line 1028 (24-inch diameter) and Line 6900 (30- and 36-inch diameter), which run from Moreno Station south to Rainbow Station.

Purpose

This filing submits for publication the results of the above mentioned Open Season pursuant to CPUC Decision 06-09-039 which requires SoCalGas to hold an Open Season in areas that are constrained or expected to soon be constrained and to publicize the results, as stated on page 63 of the decision:

"We will require that SoCalGas and SDG&E hold open seasons for firm capacity over those segments of the local transmission system which are experiencing or are expected to soon experience congestion, and that they publicize the results.... If nominations exceed the available capacity, then our expectation is that the utility will promptly upgrade the system. If, even in the event that nominations exceed capacity, the utility declines to upgrade the system, it shall file a publicly available advice letter with the Commission explaining its decision."

Background

In R.04-01-025¹, SoCalGas and San Diego Gas & Electric (SDG&E) explained the interaction between demand in SoCalGas' Rainbow Corridor and the capacity of the SDG&E system. SoCalGas determined that increasing core demand and requests for firm service by noncore customers in the Rainbow Corridor can potentially reduce capacity of the downstream SDG&E system and affect its ability to meet all requests for firm noncore service. Following D.06-09-039, the 2007 Rainbow Corridor Open Season

¹ Prepared Direct Testimony of David M. Bisi, page 16.

was held for firm service contracts commencing or renewing after May 31, 2007, concurrent with the SDG&E Open Season.

Large customers were asked to bid their desired firm service requirements for five years, and the smaller customers were asked to bid for a two-year term. All firm service requests were subject to use-or-pay obligations.

Rainbow Corridor Open Season Results

SoCalGas sent bid packages to the 26 customers that are either currently noncore, noncore eligible, or expected to be noncore eligible within the term of this Open Season. Eleven customers bid for firm noncore service, ten elected or remained core service, five elected or defaulted to interruptible noncore service. Three customers were large customers and therefore were required to bid five-year terms. One of the three large customers is SDG&E.²

SoCalGas was able to award all customer bids for firm noncore service. It should be noted that some noncore customers within the potentially constrained Rainbow Corridor area elected interruptible service. There is still a risk of interruptible service curtailment if these interruptible customers operate on a cold winter day.

Based on the customer elections and the results of the open season, the existing infrastructure is adequate to supply all core and firm noncore requirements and no expansions are planned at this time. In accordance with Special Condition 34 of the GT-F tariff, if the Commission agrees that no expansion is needed, SoCalGas will reduce the commitment for the Rainbow Corridor's large customers from five years to two years, consistent with the term for small customers. GT-F Special Condition 34 states as follows:

34. Term: For large noncore customers, the term for firm service shall be the earlier of (a) two (2) years beyond the in-service date of facilities associated with the expansion of local transmission service or (b) five (5) years. For small noncore customers, the term is two years. In the event all requests for firm noncore capacity can be awarded without proration and the Utility does not plan to expand the local transmission system within the five-year contract period, the Utility will inform the Commission. **Upon Commission agreement that there is no need to construct additional facilities within the five-year contract period, the Utility shall amend the five-year contracts to expire after two years, consistent with the term for small customers.** (Emphasis added.)

The actual capacity of the Rainbow Corridor and the SDG&E system is dependent upon the location of the customer demand on both systems. Based on the level of core demand in the Rainbow Corridor and on the SDG&E system, the current capacity of the SDG&E/Rainbow Corridor system is 725 MMcfd in the winter operating season and 670 MMcfd in the summer³. This capacity was made available to both SoCalGas Rainbow Corridor customers and SDG&E customers during the Open Seasons. The solicitations

² SDG&E is a wholesale customer of SoCalGas. SDG&E was required to submit a bid to SoCalGas for the Rainbow Corridor open season comprising its core load plus the total of SDG&E noncore customers' firm bids from SDG&E's open season.

³ Figures exclude capacity reserved for an operating margin.

resulted in peak firm demand (core and noncore) of 651 MMcfd in the winter (571 MMcfd on the SDG&E system, 80 MMcfd in the Rainbow Corridor) and 526 MMcfd in the summer (446 MMcfd on the SDG&E system, 80 MMcfd in the Rainbow Corridor), resulting in excess capacity in both operating seasons. Based on these results and SoCalGas' analysis of likely firm demand, SoCalGas has determined that no additional facilities or equivalent contractual arrangements are needed at this time. CPUC Decision 07-05-022 authorized SoCalGas and SDG&E to contract for up to 50 MMcfd of firm interstate and Mexican pipeline capacity to provide reliable deliveries of gas at Otay Mesa for the purpose of increasing firm capacity in the SDG&E/Rainbow Corridor system. In light of the open season results, SoCalGas and SDG&E do not plan to contract for firm capacity at this time. However, SoCalGas and SDG&E shall continue to rely on this important service reliability option should there be changes in operational requirements.

Protest

Anyone may protest this Advice Letter to the Commission. The protest must state the grounds upon which it is based, including such items as financial and service impact, and should be submitted expeditiously. The protest must be made in writing and must be received within 20 days of the date this Advice Letter was filed with the Commission. There is no restriction on who may file a protest. The address for mailing or delivering a protest to the Commission is:

CPUC Energy Division
Attn: Tariff Unit
505 Van Ness Avenue
San Francisco, CA 94102

Copies of the protest should also be sent via e-mail to the attention of both Maria Salinas (mas@cpuc.ca.gov) and to Honesto Gatchalian (jnj@cpuc.ca.gov) of the Energy Division. A copy of the protest should also be sent via both e-mail and facsimile to the address shown below on the same date it is mailed or delivered to the Commission.

Attn: Sid Newsom
Tariff Manager - GT14D6
555 West Fifth Street
Los Angeles, CA 90013-1011
Facsimile No. (213) 244-4957
E-mail: snewsom@SempraUtilities.com

Effective Date

SoCalGas believes that approval of this advice letter does not require a resolution to be issued by the Commission; however, the Commission may determine that a resolution is warranted in this case.

SoCalGas respectfully requests this advice letter be approved on or after July 28, 2007 which is 30 days after the date filed, or on such later date the Commission may direct by resolution.

Notice

A copy of this advice letter is being sent to all parties listed on Attachment A to this advice letter, which includes the interested parties in R.04-01-025.
