Advice No. 4241
(U 904 G)

Public Utilities Commission of the State of California

Subject: Publication of Open Season Results for Line 7000 in the San Joaquin Valley

Southern California Gas Company ("SoCalGas") hereby submits for filing with the California Public Utilities Commission ("Commission") this publication of the results of the Open Season held for firm service contracts commencing April 1, 2011 for Line 7000 in the San Joaquin Valley (SJV).

Background

SoCalGas had determined that the SJV is an area that is potentially constrained. SoCalGas conducted an Open Season in 2003, 2005, 2007, 2009, and 2011. The 2011 SJV Open Season was held for firm service contracts commencing on April 1, 2011 with use-or-pay obligations.

San Joaquin Valley Open Season Results

SoCalGas sent bid packages to one hundred nineteen (119) customers currently noncore, noncore eligible, or expected to be noncore eligible within the term of this Open Season. Forty (40) customers bid for firm noncore service, twenty-six (26) elected core service, fifty (50) elected interruptible noncore, and one (1) account closed. One (1) customer has a long-term set aside contract, one (1) account defaulted to noncore interruptible from noncore firm service because it did not meet the deadline for responding with a firm bid, and one (1) customer transferred from core to noncore service. Three (3) of the firm customers were large customers and therefore were required to bid a five-year term. SoCalGas was able to award all customer bids for firm noncore service. There is still a risk of interruptible service curtailment if these interruptible customers operate on a cold winter day.

The existing infrastructure is adequate to supply all core and firm noncore requirements and no expansions are planned at this time. Based on these results and in accordance with Special Condition 37 of Schedule No. GT-F, if the Commission agrees that no expansion is needed, SoCalGas will reduce the commitment for the SJV large customers from five years to two years, consistent with the term for small customers. Schedule No. GT-F Special Condition 37 states as follows:

Term: For large noncore customers, the term for firm service shall be the earlier of (a) two (2) years beyond the in-service date of facilities associated with the expansion of local transmission service, or the commencement of service on interstate and/or foreign pipelines or other arrangements that alleviate the need for expanding local transmission facilities, limited to the contractual commitments approved in D.07-05-022; or (b) five (5) years. For small noncore customers, the term is two years. In the event all requests for firm noncore capacity can be awarded without proration and the Utility does not plan to expand the local transmission system within the five-year contract period, the Utility will inform the Commission. Upon Commission agreement that there is no need to construct additional facilities within the five-year contract period, the Utility shall amend the five-year contracts to expire after two-years, consistent with the term for small customers.

Current capacity in the SJV is 180 MMcfd. Peak firm demand (core 1-in-10 year cold day demand plus noncore firm bids) is 150 MMcfd, leaving excess capacity of at least 30 MMcfd through 2013. Based on these results and SoCalGas' analysis of likely firm demand, SoCalGas has determined that no additional facilities are needed at this time.
