Advice No. 4497 (U 904 G)

Public Utilities Commission of the State of California

<u>Subject</u>: Rate Revision Resulting from SDG&E's Test Year 2012 General Rate Case (GRC) Rate Implementation Filing, Effective September 1, 2013

Southern California Gas Company (SoCalGas) hereby submits for approval by the California Public Utilities Commission (Commission) revisions to its tariff schedules, applicable throughout its service territory, as shown on Attachment B, to be effective September 1, 2013.

This filing is made in coordination with SDG&E's implementation of its Test Year (TY) 2012 General Rate Case (GRC) Decision (D.) 13-05-010. SDG&E is implementing its TY 2012 GRC in compliance with Ordering Paragraph (OP) 5 of D.13-05-010, dated May 9, 2013, its TY 2012 GRC Application No. (A.) 10-12-005.

Purpose

The purpose of this filing is to implement the Sempra-wide adjustments that result from SDG&E's implementation of its base margin revenue requirement as set forth in Attachment B, SDG&E 2012 Gas Summary of Earnings, of D.13-05-010. Also, this filing reflects the Sempra-wide adjustments that result from SDG&E's amortization of part of the balance in its General Rate Case Memorandum Account (GRCMA) as established in its AL 2023-G-A. The overall rate change is an increase of \$5.0 million, over June 1st, 2013.

Background

On May 9, 2013, the Commission issued D.13-05-010 adopting, among other things, SoCalGas and SDG&E's revenue requirements for their TY 2012 GRC and post-test year ratemaking. The decision also finds the effective date for the change in the revenue requirement is January 1, 2012. While SoCalGas implemented its base margin, attrition, and GRCMA amortization in AL 4496, Test Year 2012 General Rate Case (GRC) Rate Implementation Filing, with rates effective June 1, 2013, SDG&E was ordered to implement its base margin and GRCMA amortization in rates effective September 1, 2013.

The revenue requirement below includes an increase in the:

- 1) Sempra-wide NGV adjustment of \$0.1 million;
- 2) Sempra-wide EG adjustment of \$0.3 million;
- 3) Transmission Level Service (TLS) adjustment of \$0.5 million; and
- 4) System Integration adjustment of \$4.3 million.

The System Integration adjustment ensures that customers of SoCalGas and SDG&E pay for the combined transmission costs of both utilities pursuant to D.06-04-033 and AL 3771. All rate changes are filed to be effective concurrently with the SDG&E gas transportation rates to equalize the Sempra-wide NGV, EG and TLS rates effective September 1, 2013.¹

Revenue Requirement Impact by Class of Service

Class of Service	Applicable <u>Rate Schedules</u>		Net M\$ <u>se/(Decrease)</u>
Core	GR, GS, GM, GO-A0 G-NGVR, GL, G-10, G-EN, G-NGV	G-AC,	\$2.4
Noncore	GT-F, GT-I, GT-TLS		\$2.6
Backbone Transportation Service (BTS)	G-BTS		\$0.0
TOTAL			\$5.0

Included with this filing is a Summary of Annual Gas Transportation Revenues (Attachment C).

2. Class Average Long Run Marginal Cost (LRMC) Floor Rates

- a. D.98-01-040, Finding of Fact No. 5, allows SoCalGas the option to discount core transportation rates down to a LRMC floor rate; however, SoCalGas may not discount the cost of gas. For this program, the LRMC floor rate includes the following components: customer related, mediumpressure distribution, high-pressure distribution, transmission, seasonal storage, load balancing, company use transmission, unaccounted for gas, and interstate pipeline demand charges. In addition to these components, the full transportation rate includes the following components: non-marginal costs in base margin, PITCO/POPCO transition costs, core averaging costs, and other exclusion costs.
- b. The following table lists the full LRMC transportation rates authorized by D.97-04-082, and the class average LRMC floor rates authorized by D.98-01-040. LRMC Floor Rates were updated with new values established in D.00-04-060, D.01-12-018, and SoCalGas Advice No. 4053, effective January 1, 2010. Full Transportation Rates are updated with new values established in D.00-04-060, Resolution G-3303, D.01-12-018, D.06-12-031, Resolution G-3407 and SoCalGas Advice No. 4497 effective September 1, 2013. The floor rates represent the lowest possible average annual rate by class under which SoCalGas can serve gas. These rates represent a starting point for the program and, pursuant to Commission order, may be modified in future rate proceedings.

- c. Optional tariffs or negotiated rate contracts that would result in average annual rates below class average LRMC will be subject to Commission approval through the Expedited Application Docket (EAD) process.
- d. With prior Commission approval under the EAD process, SoCalGas may discount average annual rates to a floor of <u>customer-specific</u> LRMC that includes the full interstate pipeline reservation charges allocated to core customers.

3. Types of Customers and Contracts

Optional tariffs and negotiated rates are applicable to new or existing customers for the purpose of load growth or load retention.

a. New Customers

A new customer is defined as a new meter measuring volumes not previously served, or a reconnected meter measuring load that has been off the system for at least 12 months.

b. Existing Customers

In addition to customers currently connected, D.98-01-040 defines existing customers as those who have been off SoCalGas' system for less than 12 months.
