Advice No. 4827
(U 904 G)

Public Utilities Commission of the State of California

Subject: Emergency Localized Curtailment on June 30, 2015

Purpose

Southern California Gas Company (SoCalGas) hereby submits this Advice Letter to notify the California Public Utilities Commission (Commission) and affected parties of a curtailment event in its service territory.¹

Background

SoCalGas' Rule No. 23 Sections (E) and (F) provide for curtailments due to emergency conditions, and curtailments in localized areas due to intrastate capacity restrictions or emergencies. In the event of a localized curtailment, customers in unconstrained areas may receive service while other customers of equal or higher priority are curtailed.

Information

SoCalGas initiated an emergency localized curtailment for the Los Angeles basin area beginning at 3:00 PM on Tuesday, June 30, 2015 due to high demand created from hot weather conditions and will continue until further notice. The curtailment has affected certain electric generation customers in this area, who will have limited gas service during the curtailment.

Extreme hot weather in the Western region of the U.S., along with decreased sources of hydro-powered electric generation plants, created a significant demand for natural gas to fuel electric power plants. In addition, required compliance testing on one of SoCalGas' natural gas pipelines has also contributed to reduced natural gas capacity to meet increased demand. The combination of these factors required SoCalGas to

call this emergency localized curtailment in order to preserve our ability to meet the demands of higher priority core customers.

SoCalGas initiated a curtailment watch at approximately 8:15 AM on June 30, 2015 as a result of the factors referenced above. SoCalGas supplemented this curtailment watch at approximately 12:15 PM for non-curtailed areas.
