Advice No. 5040 (U 904 G)

Public Utilities Commission of the State of California

<u>Subject</u>: 2016 Annual Compliance Report on Utility System Operator's Southern System Reliability Purchases and Sales (September 1, 2015 through August 31, 2016)

Southern California Gas Company (SoCalGas) hereby submits for filing with the California Public Utilities Commission (Commission) its 2016 Annual Compliance Report (ACR) to demonstrate that activities to maintain Southern System reliability from September 1, 2015 through August 31, 2016 are in compliance with the standards, criteria, and procedures described in Sections 11 through 21 of SoCalGas Rule No. 41.

Background

Pursuant to SoCalGas Rule No. 41, Section 27, SoCalGas is to submit an ACR on October 1 of each year regarding its Southern System reliability procurement activities for the previous 12-month period ending on August 31:

On October 1 of each year, the Utility shall provide a report ("Annual Compliance Report") demonstrating that the Operational Hub's procurement activities during the preceding twelve months ending August 31 were in compliance with the standards, criteria and procedures described in Sections 9 through 19 above. The Annual Compliance Report shall be submitted to the Energy Division by Advice Letter and shall be subject to comment or protest. Upon Energy Division review and verification of the Annual Compliance Report and the CPUC Resolution approving the Annual Compliance Report, all the transactions entered into the SRMA balance for the year in question that are found reasonable by the Energy Division

¹ After the adoption of this provision SoCalGas added new sections to Rule No. 41, and the existing Sections 9 and 19 were changed to Sections 11 and 21, respectively. The text in both these sections was not changed, just the numbering.

shall be amortized in customer transportation rates over the following year.²

In Resolution G-3480 (relating to SoCalGas' 2012 ACR), the Commission provided additional direction regarding the content of future ACRs:

[F]uture ACRs should include a narrative statement and a table in the text of the report presenting the number and percent of transactions by the Section of Rule 41 under which SoCalGas asserts the transactions to be reasonable. A narrative explanation for any transaction not meeting the requirements of Sections 13 and 14 should be included in any future ACR, and supplemented with additional exhibits and documentation as appropriate.

SoCalGas shall incorporate, in all future ACRs, a table, as described in ordering paragraph 3.(b) and narrative explanations supported by appropriate documentation for any transactions to be evaluated as reasonable under Section 15 of Rule 41.³

Discussion

In accordance with Rule No. 41, SoCalGas hereby submits its ACR for the 12-month period ending August 31, 2016. SoCalGas believes that all of the transactions described in this ACR are reasonable and subject to amortization in customer transportation rates during 2017.

A. Transaction Overview

As shown in Attachment A, from September 1, 2015 through August 31, 2016, SoCalGas spent \$5,128,103 to help satisfy Southern System minimum flow requirements. SoCalGas purchased 39,158,590 dths (net of in-kind fuel) of gas at Ehrenberg for \$95,719,175. This gas was then resold at the SoCal Citygate for \$97,027,495 for a net gain of \$1,308,320. In addition to this net purchase gain, the System Operator incurred \$6,436,422 of transportation charges.

² This provision is the result of D.09-11-006, which adopted SoCalGas' 2009 BCAP Phase Two Settlement Agreement. The acronym "SRMA" in the quotation above refers to SoCalGas' System Reliability Memorandum Account. As explained in Rule No. 41, Section 22, "The cost and revenues of Operational Hub transactions (e.g., natural gas purchases, sales, or exchanges resulting from approved contracts) that are necessary to meet minimum flow requirements shall be recorded in the System Reliability Memorandum Account (SRMA)."

³ Resolution G-3480 at 11-12 and 12-13. After the issuance of this resolution SoCalGas added new sections to Rule No. 41, and the existing Section 13, 14, and 15 were changed to Sections 15, 16, and 17, respectively. The text of these sections was not changed, just the numbering.

B. Transaction Detail

Attachment B provides the details of the purchases and sales summarized in Attachment A.⁴ Table 1 below shows that 3% of purchase transactions were within the automatic safe harbor price limits for spot gas purchases and resales described in Section 15 of Rule No. 41. Another 5% were within parameters for spot gas purchases described in Section 16 of Rule No. 41.⁵ There were two very small Section 17 transactions (deliveries at Otay Mesa) on June 21st and 22nd. All four winter baseload contracts, representing 73% of purchases, were within the parameters described in Section 20 of Rule No. 41.⁶ The remaining 18% of purchases (comprised of nine August baseload contracts) were within the parameters described in Section 29 of Rule No. 41.⁷

· Au - - - - - - - - - 1 D :--

⁴ Attachment B includes the cycle in which the transaction was executed (for purchases to be evaluated as reasonable under Section 13 (currently re-numbered as Section 15) of Rule No. 41) per Resolution G-3504, Ordering Paragraph No. 2.

⁵ Pursuant to Section 16, "When less than the required volumes are available on ICE, the Operational Hub shall contact gas suppliers (other than the Utility Gas Procurement Department or affiliates), request offers for the necessary supplies, and record their offers for gas delivered to the relevant trading points to ensure at least three offers from three different suppliers are available for comparison."

These four contracts were with four suppliers. Section 20 states: "Should the Operational Hub deem it necessary or advisable to enter into baseload contracts for Southern System support at one or more of the Southern System receipt points, the Operational Hub shall be deemed to have made reasonable baseload purchases if: (1) the total cumulative baseload volumes at any time are less than or equal to 255,000 Dth/day; (2) the price is less than or equal to NGI's Bidweek average for "Southern Cal. Bdr. Avg." plus 8.2 cents/Dth for the relevant baseload month(s); (3) the term is for the December - March period, or any subset of that period; and (4) the baseload contracts can only be made for one season at a time and only within the ninemonth period directly preceding that season. The Operational Hub shall be deemed to have made reasonable sales of such baseload gas if: (1) for baseload sales, the sale price is greater than or equal to 90% of NGI's Bidweek average for "SoCal Citygate" for the relevant baseload month(s); and (2) for spot sales, the sale price is greater than or equal to 90% of the ICE Wtd Avg Index for the relevant trading point and trading period."

⁷ Section 29 states: "Should the Operational Hub deem it necessary or advisable to enter into baseload contracts for Southern System support at one or more of the Southern System receipt points, the Operational Hub shall be deemed to have made reasonable baseload purchases if: (1) the total cumulative baseload volumes at any time are less than or equal to 200,000 Dth/day; (2) the price is less than or equal to NGI's Bidweek average for "Southern Cal. Bdr. Avg." plus 8.2 cents/Dth for the relevant baseload month(s); and (3) the term is for the August - September period, or any subset of that period. The Operational Hub shall be deemed to have made reasonable sales of such baseload gas if: (1) for baseload sales, the sale price is greater than or equal to 90% of NGI's Bidweek average for "SoCal Citygate" for the relevant baseload month(s); and (2) for spot sales, the sale price is greater than or equal to 90% of the ICE Wtd Avg Index for the relevant trading point and trading period."

The average net cost (purchase price minus sale price plus transport cost) of the spot gas purchases (Sections 15,16, and 17) was 79 cents/dth.⁸ The average net cost of the baseload purchases (Sections 20 and 29) was 9 cents/dth.⁹ Seventy percent of the necessary spot gas purchases were made in July 2016—a peak electric generation month that was not covered by any baseload contract commitments.¹⁰

All sales transactions had prices that were within the automatic safe harbor provisions described in Sections 15, 20, and 29 of Rule No. 41.

On July 8, 2016, the Commission approved SoCalGas' Advice Letter (AL) 4970 (in a disposition letter) authorizing SoCalGas a three-year extension of preauthorization of winter baseload contracts to support the Southern System until March 31, 2019. The commission determined that over the last three years, preauthorized baseload contracts have acted as an effective insurance policy protecting ratepayers from volatility in the spot market. The cost effectiveness of winter baseload contracts for the winter of 2015/16 is shown in Attachment B to AL 4970.

Attachment B shows there were at least three offers from three different suppliers that were available for comparison before completing Section 16 spot gas purchases.

Attachment C shows the ICE calculations for the Section 15 purchases and sales. 12

All spot gas purchases were in response to System Operator requests for supply as documented in Attachment D. None of these requests mention any relationship to Aliso Canyon. In addition, the chart below shows that the Southern System minimum over this ACR period was not significantly different than under the prior ACR period in which the Aliso storage facility was fully functional. Therefore, we conclude that none of the \$5.13 million Southern System support costs over this period were attributable to events at the Aliso Canyon storage facility.¹³

These counterparty names are confidential and being submitted only to the Energy Division pursuant to the confidentiality provisions of General Order (GO) 66-C and Section 583 of the Public Utilities Code.

C. Over-nomination Event Information

In Resolution G-3486 (issued December 6, 2013), the Commission approved a proposed revision to SoCalGas' Rule No. 30 to clarify the procedures used in situations where there is a system-wide over-nomination yet additional supplies are needed on SoCalGas' Southern System. The Commission required that SoCalGas provide information concerning the impact of the Rule No. 30 revision in future ACRs. This information includes: a) the frequency of events where over-nominations occurred system-wide yet the System Operator was required to maintain minimum flows to the Southern System; b) the effectiveness of the 10% margin of error and any need to increase or decrease the margin; and c) the observed impact on other receipt points.¹⁴ The referenced over-nomination event information is provided below.

¹⁴ See Resolution G-3486, Ordering Paragraph No. 2.

-

a. Frequency

This analysis is included as Attachment F to this AL. In the reporting period, there were a total of 24 days where a Southern System reliability purchase coincided with an operational flow order (OFO).¹⁵

b. and c. Margin of Error and Impact on Other Receipt Points

In the reporting period, there were a total of 24 days where a Southern System reliability purchase coincided with an operational flow order (OFO). On 15 of these days, scheduled volumes at the Southern System on the cycle when the OFO was declared were much higher (between 68,000 dth and 407,000 dth) than 110% of the posted minimum. The percentage reductions that occurred on the Southern System in response to the OFOs were similar to those at other receipt points. Thus, on these days the 10% 'margin of error' was not binding and did not affect scheduled deliveries at other receipt points during the OFO day.

On two occasions, June 22 and July 24, 2016, scheduled volumes in the Southern System were lower than 100% of the minimum after the OFO was declared and remained below the minimum throughout the day. Since supplies could not even meet 100% of the minimum on these days, the 10% margin of error was not binding and had no effect on the Southern System or other receipt points.

There were 7 days in which the 10% margin of error affected supplies at other receipt points:

On Feb 19 and 20, 2016, scheduled volumes in the Southern System were held slightly above 110% of the minimum after a cycle 1 OFO was declared. Supplies at other receipt points declined by 116,000 dth, or 6%. Had the minimum been 100%, rather than 110%, the supplies at other receipt points would have been reduced by only 59,000 dth, or 3%. On these days, the impact on other receipts points was 57,000 dth.

On August 6, 2016, a cycle 1 OFO was declared when scheduled volumes in the Southern System were below 110% of the minimum flow requirement. Southern System supplies on that day increased to the 110% minimum level on cycle 2. Supplies at other receipt points, however, declined by 397,000 dth, or 20%. Had the minimum been 100%, rather than 110%, the supplies at other receipt points would have been reduced by only 339,000 dth, or 17%. On this day, the impact on other receipts points was 58,000 dth.

¹⁵ This is out of a total of 88 high OFO days.

On Aug 9 and 10, 2016, scheduled volumes in the Southern System were held to 110% of the minimum after a cycle 2 OFO was declared. Supplies at other receipt points increased by 12,000 dth, or less than 1%. Had the minimum been 100%, rather than 110%, the supplies at other receipt points would have increased by 72,000 dth, or 4%. On these days, the impact on other receipts points was 60,000 dth.

On August 20 and 21, 2016, scheduled volumes in the Southern System were held to 110% of the minimum after a cycle 3 OFO was declared. Supplies at other receipt points declined by 138,000 dth, or 7%. Had the minimum been 100%, rather than 110%, the supplies at other receipt points would have been reduced by only 76,000 dth, or 4%. On these days, the impact on other receipts points was 62,000 dth.

In summary, there were 7 days where the 110% minimum affected other receipts points; on average, supplies at those points were reduced by 59,000 dth more than had there been no 10% margin of error. This impact of the Rule No. 30 revision seems negligible, and even if that were not the case, SoCalGas believes that a 110% margin is necessary.

Conclusion

For the reasons set forth above, SoCalGas respectfully requests that the Commission approve the ACR and determine that all of the transactions entered into the SRMA balance for September 1, 2015, through August 31, 2016, are reasonable and subject to amortization in customer transportation rates during 2017.

Advice No. 5040

TRANSACTIONS, CONFIDENTIAL

CONFIDENTIAL AND PROTECTED MATERIAL PROVIDED ONLY TO THE ENERGY DIVISION PURSUANT TO PUC SECTION 583, GO 66-C, AND D.16-08-024

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

DECLARATION OF GWEN R. MARELLI REGARDING CONFIDENTIALITY OF CERTAIN DATA PURSUANT TO DECISION (D.) 16-08-024

I, Gwen R. Marelli, do declare as follows:

- 1. I am the Director of Energy Markets and Capacity Products in the Energy Markets and Capacity Products department for Southern California Gas Company ("SoCalGas"). I have been delegated authority to sign this declaration by Jimmie I. Cho, Senior Vice President—Gas Operations and System Integrity. I have reviewed Attachment G to Advice No. 5040, 2016 Annual Compliance Report on Utility System Operator's Southern System Reliability Purchases and Sales (September 1, 2015 through August 31, 2016), submitted concurrently herewith (AL 5040 Attachment G). I am personally familiar with the facts and representations in this Declaration and, if called upon to testify, I could and would testify to the following based upon my personal knowledge and/or belief.
 - 2. I hereby provide this Declaration in accordance with D. 16-08-024.
- 3. For the reasons set forth in Attachment A to this Declaration, the information identified as confidential in AL 5040 Attachment G should receive confidential treatment and be protected from public disclosure under applicable statutory provisions including, but not limited to, General Order (GO) 66-C, Section 2.2(b), and Public Utilities Code Section 583.

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct to the best of my knowledge.

Executed this 3rd day of October 2016, at Los Angeles, California.

SoCalGas Request for Confidentiality

| Location of Data | Description of Data | Applicable Confidentiality Provisions | Basis for Confidentiality |
|----------------------------|------------------------|--|--|
| AL 5040 Attachment G | Counterparty names | Gov't Code 6254(k), 6254.7 (d); Evid. Code 1060; Civil Code 3426 et set. GO 66-C Section 2.2(b), 2.8 D.09-08-018, 2011 WL 660568 (2011) | Specific trade information on volume and price in connection with the correlated counterparty (seller or buyer) must be kept confidential pursuant to the confidentiality provisions within our trading agreements (NAESB) with third parties. This data is market sensitive and disclosure of it would place SoCalGas at an unfair business disadvantage. Since the net costs of these transactions (purchases and sales) are recovered in customer's rates, SoCalGas' unfair business disadvantage would also be against the public interest. If the Commission mandates the release of this information, it would expose SoCalGas' trading parties and impact all future negotiations. Thus, the release of this non-public, confidential information would allow market participants to utilize this information to SoCalGas' business disadvantage, and thus ratepayer disadvantage. |
