PUBLIC UTILITIES COMMISSION
505 Van Ness Avenue
San Francisco CA 94102-3298

To: Energy Company Filing Advice Letter

From: Energy Division PAL Coordinator

Subject: Your Advice Letter Filing

The Energy Division of the California Public Utilities Commission has processed your recent Advice Letter (AL) filing and is returning an AL status certificate for your records.

The AL status certificate indicates:

- Advice Letter Number
- Name of Filer
- CPUC Corporate ID number of Filer
- Subject of Filing
- Date Filed
- Disposition of Filing (Accepted, Rejected, Withdrawn, etc.)
- Effective Date of Filing
- Other Miscellaneous Information (e.g., Resolution, if applicable, etc.)

The Energy Division has made no changes to your copy of the Advice Letter Filing; please review your Advice Letter Filing with the information contained in the AL status certificate, and update your Advice Letter and tariff records accordingly.

All inquiries to the California Public Utilities Commission on the status of your Advice Letter Filing will be answered by Energy Division staff based on the information contained in the Energy Division's PAL database from which the AL status certificate is generated. If you have any questions on this matter please contact the:

Energy Division's Tariff Unit by e-mail to
edtariffunit@cpuc.ca.gov

Advice No. 5584
(U 904 G)

Public Utilities Commission of the State of California

Subject: Revisions to Rule No. 13 – Meters and Equipment and Rule No. 24 – Supply to Separate Premises and Resale of Gas

Southern California Gas Company (SoCalGas) hereby submits for approval by the California Public Utilities Commission (Commission or CPUC) revisions to its Rule No. 13, Meters and Equipment, and Rule No. 24, Supply to Separate Premises and Resale of Gas, applicable throughout its service territory, as shown on Attachment A.

Purpose

The purpose of this Advice Letter (AL) is to revise Rule No. 13 and Rule No. 24 to make tariff language changes that are in alignment with the Public Utilities Code (PUC), Article 3. Equipment, Practices, and Facilities, Section 780.5 (PUC Code).

Background

SoCalGas' tariffs reflect and represent the outcome of numerous Commission decisions, resolutions, rulings, general orders, code changes, laws, and policy changes that have occurred over the years. As a result, tariff language and/or conditions of service expire or become obsolete. Currently, Rule Nos. 13 and 24 do not mention the building permit requirement and are missing two of the exceptions. The PUC Code indicates individual metering is required when residential units are equipped with vented gas appliances and when a building permit has been obtained on or after July 1, 1982. Additionally, the PUC Code outlines exceptions. Hence, SoCalGas proposes to remove obsolete language in its Rule No. 13 and Rule No. 24 to add language consistent with the PUC Code, which outlines the following:

The commission shall require every residential unit in an apartment house or similar multiunit residential structure, condominium, and mobilehome park for

which a building permit has been obtained on or after July 1, 1982, other than a dormitory or other housing accommodation provided by any postsecondary educational institution for its students or employees and other than farmworker housing, to be individually metered for electrical and gas service, except that separate metering for gas service is not required for residential units which are not equipped with gas appliances requiring venting or are equipped with only vented decorative appliances or which receive the majority of energy used for water or space heating from a solar energy system or through cogeneration technology.

Requested Revisions

SoCalGas proposes the following revisions to its Rule No. 13, section *B. Meter Installation*, Sheet 2:

Individual metering is required for every residential unit in an apartment house or similar multiunit residential structure, condominium, and mobilehome park for which a building permit has been obtained on or after July 1, 1982, other than a dormitory or other housing accommodation provided by any postsecondary educational institution for its students or employees and other than farmworker housing, except that separate metering for gas service is not required for residential units which are not equipped with gas appliances requiring venting or are equipped with only vented decorative appliances or which receive the majority of energy used for water or space heating from a solar energy system or through cogeneration technology. ~~new multi-unit residential structures where such multi-unit tenants use gas directly in gas appliances that individually serve each occupancy and which require venting. Exception: Effective January 1, 2005, pursuant to Senate Bill 1891, if the only vented appliances serving the dwelling unit are decorative appliances the unit is not required to be separately metered and may receive its gas supply through a master meter.~~ Such individual metering will be provided by the Utility.

SoCalGas proposes the following revisions to its Rule No. 24, B. *Furnishing and Metering of Gas*, section 1.a. *Appliances Requiring Venting* (Sheet 1):

~~Each new~~ Individual metering is required for each single or Multi-family Accommodation unit, where the tenant can use gas directly in gas appliances requiring venting, and for which a building permit has been obtained on or after July 1, 1982, other than a dormitory or other housing accommodation provided by any postsecondary educational institution for its students or employees and other than farmworker housing. ~~shall be individually metered by the Utility. However, pursuant to Senate Bill 1891 effective January 1, 2005, if the only vented appliances serving the dwelling unit are decorative appliances, the unit is not required to be separately metered and~~ Separate metering for gas service is not required for residential units which are not equipped with gas

appliances requiring venting or are equipped with only vented decorative appliances or which receive the majority of energy used for water or space heating from a solar energy system or through cogeneration technology. For these exceptions, the unit may receive its gas supply through a master meter, as expressly provided in Rule No. 13, Meters and Appliances.

This submittal will not result in any increase or decrease in any rate or charge, conflict with any rate schedule or any rules, or cause the withdrawal of service.

Protest

Anyone may protest this AL to the Commission. The protest must state the grounds upon which it is based, including such items as financial and service impact, and should be submitted expeditiously. The protest must be made in writing and received within 20 days of the date of this AL, which is March 4, 2020. The address for mailing or delivering a protest to the Commission is:

CPUC Energy Division
Attention: Tariff Unit
505 Van Ness Avenue
San Francisco, CA 94102

A copy of the protest should also be sent via e-mail to the attention of the Energy Division Tariff Unit (EDTariffUnit@cpuc.ca.gov). A copy of the protest shall also be sent via both e-mail and facsimile to the address shown below on the same date it is mailed or delivered to the Commission.

Attn: Ray B. Ortiz
Tariff Manager - GT14D6
555 West Fifth Street
Los Angeles, CA 90013-1011
Facsimile No.: (213) 244-4957
E-mail: ROrtiz@socalgas.com

Effective Date

SoCalGas believes this AL is subject to Energy Division disposition, and should be classified as Tier 2 (effective after staff approval) pursuant to General Order (GO) 96-B. Therefore, SoCalGas respectfully requests that this submittal become effective for service on March 14, 2020, which is 30 calendar days from the date submitted.

Notice

A copy of this AL is being sent to SoCalGas' GO 96-B service list. Address change requests to the GO 96-B service list should be directed by e-mail to tariffs@socalgas.com or call 213-244-2837.

METERS AND EQUIPMENT

(Continued)

B. METER INSTALLATION (Continued)

Upon application by the owner, lessee or tenant, and as may otherwise be permitted by this Rule, a single meter and/or regulator will be furnished and installed in some convenient place approved by the Utility in accordance with Utility practice, upon the customer's premises, when it is the desire of the owner, lessee or tenant to install sub-meters and/or sub-regulators to meter and/or regulate the gas supply to various units, buildings, or equipment; provided, however, that the Utility shall not be required to supply sub-meters or sub-regulators. In such cases, the subsidiary meters and regulators installed for the segregation of gas deliveries beyond the outlet connection of the Utility's meter shall be furnished, installed, maintained, and tested by the owner, lessee or tenant at his own expense.

When the owner of a premises served through a single meter desires to convert his service so that tenants will be individually metered and thereby become applicants for gas service of the Utility, it will be the owner's responsibility to post and give written notice of such proposed change to each tenant affected thereby, at least 30 days in advance.

Individual metering is required for every residential unit in an apartment house or similar multiunit residential structure, condominium, and mobilehome park for which a building permit has been obtained on or after July 1, 1982, other than a dormitory or other housing accommodation provided by any postsecondary educational institution for its students or employees and other than farmworker housing, except that separate metering for gas service is not required for residential units which are not equipped with gas appliances requiring venting or are equipped with only vented decorative appliances or which receive the majority of energy used for water or space heating from a solar energy system or through cogeneration technology. Such individual metering will be provided by the Utility.

RESOLUTION NO. _____

Rule No. 24

Sheet 1

SUPPLY TO SEPARATE PREMISES AND RESALE OF GAS

A. SEPARATE METERING

Separate premises, even though owned by the same customer, will not be supplied through the same meter, except as may be specifically provided for in the tariff schedules. However, service may be rendered through one meter installation to two or more oil field premises operated by a single enterprise.

B. FURNISHING AND METERING OF GAS

1. Residential Service

- a. Appliances Requiring Venting. Individual metering is required for each single or Multi-family Accommodation unit where the tenant can use gas directly in gas appliances requiring venting, and for which a building permit has been obtained on or after July 1, 1982, other than a dormitory or other housing accommodation provided by any postsecondary educational institution for its students or employees and other than farmworker housing. Separate metering for gas service is not required for residential units which are not equipped with gas appliances requiring venting or are equipped with only vented decorative appliances or which receive the majority of energy used for water or space heating from a solar energy system or through cogeneration technology. For these exceptions, the unit may receive its gas supply through a master meter, as expressly provided in Rule No. 13, Meters and Appliances.
- b. Individually Metered vs. Submetered. Each space or lot in mobilehome parks or manufactured housing communities, where the tenant can use gas directly in gas appliances, shall be individually metered by the Utility or submetered by the owner or operator of the mobilehome park or manufactured housing community, if construction had commenced prior to January 2, 1997. Each space or lot in new mobilehome parks or manufactured housing communities, for which construction has commenced after January 1, 1997, shall be individually metered by the Utility.
- c. Mobilehome Park or Manufactured Housing Community Expansion. If an existing master meter mobilehome park or manufactured housing community constructed prior to January 2, 1997 is adding new spaces, the Customer will make a determination as to whether such added spaces are to be served by the Utility or through the existing master meter, based on whether the site conditions will permit the installation and maintenance of a new gas distribution system and individual meters by the Utility in compliance with the provisions of Rules No. 20 and 21 or whether, in the reasonable determination of the Customer, it is practicable to have the master meter customer extend their distribution system and supply gas to the new tenants through the existing master meter and customer owned submeters.

B. FURNISHING AND METERING OF GAS (Continued)

1. Residential Service (Continued)

d. Master Meter. Where an existing residential customer receives gas through a single meter to an apartment house, mobilehome park or other Multi-family Accommodation, such customer may continue to master-meter, provided:

1. The cost of gas is absorbed in the rent for each individual dwelling unit; there is no separate identifiable charge by such customer to the tenants for gas; and the rent does not vary with gas consumption, or

2. The customer submeters and furnishes gas to residential tenants at the same rates and charges that would apply if the tenants were purchasing such gas directly from the Utility, and

(a) The master meter customer provides each submetered tenant with an itemized bill similar in form and content to the Utility's bills to its residential customers including, but not limited to, the meter reads, dates, billing factors, terms and the identification of all rates and quantities attributable to each block in the rate structure. In addition, a copy of the current applicable residential rate schedules and a listing of the customer safety services available from the Utility, without charge, shall be posted in a conspicuous place on the premises.

(b) In the event that any rebate is provided the master meter customer, such customer shall distribute, or credit, to the account of each current submetered tenant that portion of the refund which the volume of gas used during the preceding billing period bears to the total volume of gas used by the master meter customer.

(c) In the event a customer subsequently converts to and receives service under an applicable submetering rate schedule as provided in B.3 below, tenant rental charges shall be reduced for the duration of the lease to reflect removal of the energy related charges.

Rule No. 24

Sheet 3

SUPPLY TO SEPARATE PREMISES AND RESALE OF GAS

(Continued)

B. FURNISHING AND METERING OF GAS (Continued)

1. Residential Service (Continued)

- e. Submeter Maintenance and Testing. Where the customer is the owner, lessee, or operator of an apartment house or other Multi-family Accommodation (including mobilehomes in mobilehome parks), and submeters and furnishes gas to tenants in accordance with B.1.d.2 above, said customer shall furnish, install, maintain and test the submeters.
- f. Common Central Facilities. Nothing in this section shall prevent the Utility from furnishing separately metered service to gas-fired equipment such as boilers, heaters and furnaces, used in common by residential tenants or owners.

2. Multi-Tenant Non-Residential Service

Multi-tenant, non-residential facilities may receive gas supplied through either of the following for revenue billing:

- a. An individual meter for each tenant space or facility. However, where in the opinion of the Utility it is impractical to meter individually each premises or space, or where the Commission has authorized the Utility to supply gas service through a single meter, the Utility may provide service through a single meter, subject to the provision of B.2.b below; or
- b. A single meter. Submetering of non-residential service is prohibited. A customer shall not charge others for gas received through a single meter except where the cost of gas is absorbed in the rent for each individual tenant. The rent shall not vary with gas consumption, and there shall be no separate identifiable charge to the tenants for gas.

3. Conversion from Non-Residential Purpose to Residential Use

Buildings originally constructed for a non-residential purpose that subsequently converted to residential use on or after December 15, 1981 without the need for a building permit shall be eligible to convert from their prior rate schedule to an existing applicable residential service submetering rate schedule. Any non-residential building converted to residential use for which a building permit was required on or after July 1, 1982, must be separately metered by the Utility.
