Advice No. 5629
(U 904 G)

Public Utilities Commission of the State of California

Subject: Revisions to Schedule No. G-BTS to Accommodate Any California Producer That Completed Building its Interconnect Facility Per Rule No. 39 for Delivery Into Either Northern Zone, Southern Zone, or Wheeler Ridge Zone

Southern California Gas Company (SoCalGas) hereby submits for approval with the California Public Utilities Commission (Commission or CPUC) revisions to SoCalGas' Schedule No. G-BTS, Backbone Transportation Service, applicable throughout its service territory as shown on Attachment A.

Purpose

This submittal describes changes to SoCalGas' Schedule No. G-BTS that are necessary to accommodate any California Producer that completed building its interconnect facility per SoCalGas Rule No. 39 for delivery into the Northern Zone, Southern Zone, or Wheeler Ridge Zone and wishes to participate in SoCalGas' upcoming 2020 Backbone Transportation Service (BTS) Open Season. These changes are required to address the expansion of renewable gas production outside of CP-Line 85 Zone and CP-Coastal Zone.

Background

Per SoCalGas' Schedule No. G-BTS, Special Conditions, SET-ASIDES: Pre-Open Season - Step 1, provision 6, SoCalGas provides a set-aside option to a party who funds receipt point capacity to the SoCalGas Pipeline System under SoCalGas' Rule No. 39.

While California Producers located solely in either Northern Zone, Southern Zone, or Wheeler Ridge Zone (non-California Producer Transmission Zones) should receive set-aside options at an appropriate California Supply receipt point based on their physical location, these receipt points currently do not exist in SoCalGas' Electronic

Bulletin Board. SoCalGas needs to accommodate these California Producers located outside of CP-Line 85 Zone and CP-Coastal Zone.

Requested Tariff Revisions and Related Activities

In order to accommodate the participation of California Producers located in Northern Zone, Southern Zone, or Wheeler Ridge Zone in SoCalGas' 2020 Pre-Open Season Step 1, SoCalGas needs to provide a set-aside option at CP-Other Zone to any California Producer that has completed building its interconnect facility per Rule No. 39 for delivery into the Northern Zone, Southern Zone, or Wheeler Ridge Zone.

To accomplish this, SoCalGas needs to make the following revisions to Schedule No. G-BTS, Special Conditions, SET-ASIDES: Pre-Open Season - Step 1, provision 4 (Sheet 9):

California Producers including Exxon Mobil's production at Santa Ynez whose facilities are connected directly to the (i) Utility's Line 85, (ii) North Coastal system or (iii) another system **not part of Utility's Line 85 system or North Coastal system** ~~without a single identified receipt point or transmission zone~~ will receive a set-aside option for a quantity equal to the producer's peak month's daily average production over the most recent three-year period. Peak month is defined as the month with the highest average daily volume. The set-aside quantity shall be increased if the specific production is likely to increase and such forecasted increase can be justified by the producer. California Producers may elect all or a portion of the set-aside quantity. This set-aside applies to any SoCalGas "native gas" **or renewable gas** production. Occidental of Elk Hills, Inc. will be provided a similar set-aside option for 90 MMcfd at the OEHI Gosford receipt point.
