PUBLIC UTILITIES COMMISSION
505 Van Ness Avenue
San Francisco CA 94102-3298

To: Energy Company Filing Advice Letter

From: Energy Division PAL Coordinator

Subject: Your Advice Letter Filing

The Energy Division of the California Public Utilities Commission has processed your recent Advice Letter (AL) filing and is returning an AL status certificate for your records.

The AL status certificate indicates:

- Advice Letter Number
- Name of Filer
- CPUC Corporate ID number of Filer
- Subject of Filing
- Date Filed
- Disposition of Filing (Accepted, Rejected, Withdrawn, etc.)
- Effective Date of Filing
- Other Miscellaneous Information (e.g., Resolution, if applicable, etc.)

The Energy Division has made no changes to your copy of the Advice Letter Filing; please review your Advice Letter Filing with the information contained in the AL status certificate, and update your Advice Letter and tariff records accordingly.

All inquiries to the California Public Utilities Commission on the status of your Advice Letter Filing will be answered by Energy Division staff based on the information contained in the Energy Division's PAL database from which the AL status certificate is generated. If you have any questions on this matter please contact the:

Energy Division's Tariff Unit by e-mail to
edtariffunit@cpuc.ca.gov

Advice No. 5971
(U 904 G)

Public Utilities Commission of the State of California

Subject: Revisions to Rule No. 41, Utility System Operation

Southern California Gas Company (SoCalGas) hereby submits for approval by the California Public Utilities Commission (Commission or CPUC) proposed revisions to its Rule No. 41, Utility System Operation, applicable throughout its service territory, as shown on Attachment A.

Purpose

SoCalGas requests authorization to revise Rule No. 41 to extend SoCalGas' authority to enter into baseload contracts for July through September 2022, 2023, and 2024 and December through March 2022/2023, 2023/2024, and 2024/2025 to support Southern System reliability during the next three peak summer and winter seasons.

Background

In Resolution G-3477, the CPUC provided SoCalGas preauthorization to enter into Southern System support baseload contracts that met a defined set of criteria. The preauthorization was for the peak winter months, and expired March 31, 2013. In approving SoCalGas' request, the Commission concluded that baseload contracts "provide an efficient method to manage Southern System minimum flow requirements."¹ This initial authority was described in SoCalGas' Rule No. 41:

Should the Operational Hub deem it necessary or advisable to enter into baseload contracts for Southern System support at one or more of the Southern System receipt points, the Operational Hub shall be deemed to have made reasonable baseload purchases if: (1) the total cumulative baseload volumes at any time are less than or equal to 255,000 Dth/day; (2) the price is less than or equal to NGI's Bidweek average for "Southern

¹ Resolution G-3477 at 18, Finding of Fact 14.

Cal. Bdr. Avg." plus 8.2 cents/Dth for the relevant baseload month(s); (3) the term is for the December-March period, or any subset of that period; and (4) the baseload contracts can only be made for one season at a time and only within the nine month period directly preceding that season. The Operational Hub shall be deemed to have made reasonable sales of such baseload gas if: (1) for baseload sales, the sale price is greater than or equal to 90% of NGI's Bidweek average for "SoCal Citygate" for the relevant baseload month(s); and (2) for spot sales, the sale price is greater than or equal to 90% of the ICE Wtd Avg Index for the relevant trading point and trading period. This provision shall expire on March 31, 2016, unless extended by the Commission. SoCalGas may seek extension or modification of this provision by standard advice filing or application.²

On May 25, 2016, SoCalGas submitted Advice No. (AL) 4970, requesting a three-year extension of its preauthorization authority for these winter-month baseload contracts to support the Southern System, through March 31, 2019. AL 4970 was approved by disposition letter effective July 8, 2016.

On May 3, 2017, SoCalGas submitted AL 5132, requesting authorization to revise Rule No. 41 to provide preauthorization to enter into baseload contracts for the peak summer months of July through September of 2017 and 2018. The AL was approved and became effective on June 2, 2017. Following the approval of AL 5132, SoCalGas revised Section 20 of Rule No. 41 to include both the summer and winter preauthorized baseload provisions.

On April 9, 2019, SoCalGas submitted AL 5454, requesting authority to change Rule No. 41 to provide a three-year extension to the preauthorization to enter into baseload contracts for the peak summer months of July through September from 2019 to 2021, and the winter months of December through March from 2019 to 2022. AL 5454 was approved on May 9, 2019.

Requested Authorization

SoCalGas respectfully requests another three-year extension to the preauthorization to enter into baseload contracts for the peak summer months of July through September and peak winter months of December through March for the period starting July 1, 2022 and ending March 31, 2025. All requirements would remain consistent with the current preauthorization described in Rule No. 41, Section 19, which expired on March 31, 2022. In the summer months SoCalGas would continue to be preauthorized to enter into no more than 200,000 Dth/d of baseload contracts, while in the winter months SoCalGas would continue to be preauthorized to purchase no more than 255,000 Dth/d. This extension request is consistent with Rule No. 41, Section 19, which provides that "SoCalGas may seek extension or modification of this provision by standard advice filing or application."

² SoCalGas Rule No. 41, Section 18, as submitted in SoCalGas Advice No. 4516 and 4516-A and effective November 21, 2013.

Analyses previously provided by SoCalGas have shown that baseload contracts insure ratepayers against adverse moves in spot prices and can result in significant cost savings during periods of high price volatility. These analyses were presented in the Annual Compliance Reports on Utility System Operator's Southern System Reliability Purchases and Sales filed with the Commission and are publicly available. For example, as shown in AL 4690, Attachment C, baseload purchases made for the period between December 2013 and March 2014 resulted in net customer savings of \$8.4 million. Similarly, Attachment F in AL 5360 shows that baseload purchases made in September 2017 generated ratepayer savings of \$0.18 million.

In addition to generating ratepayer savings, baseload contracts provide more reliable supplies of Southern System support gas. For example, as explained in AL 5132, during the Summer of 2016, SoCalGas purchased 200,000Dth/d of baseload supplies on August and September but relied solely on spot purchases and Backbone Transportation Service (BTS) discounts during the month of July. On average, during July supplies acquired through spot transactions were cut³ by approximately 5% per day and up to 34% on a single day. In contrast, during August and September supplies from baseload contracts were, on average, cut by less than 0.4% per day and never by more than 5% on a single day.

While SoCalGas has not entered into baseload contracts since October 1, 2017, SoCalGas believes baseload contracts will continue to be an important tool for providing reliable flowing supplies at a reasonable cost should gas purchases once again be needed at the Southern System. SoCalGas has shown prudence in not entering into baseload contracts over the last several peak seasons, since supply constraints in other parts of the system have led to decreased Southern System reliability concerns. If an extension of preauthorization is granted, SoCalGas will analyze both operational and market conditions to determine baseload volumes for each month, subject to the price and volume constraints imposed by the Commission, and will only enter into contracts to the extent dictated by these conditions.

Tariff Modification

In order to implement the above proposal, SoCalGas requests that Section 19 of Rule No. 41 be modified as follows:

Should the Operational Hub deem it necessary or advisable to enter into baseload contracts for Southern System support at one or more of the Southern System receipt points, the Operational Hub shall be deemed to have made reasonable baseload purchases if: (1) the total cumulative baseload volumes at any time are less than or equal to 255,000 Dth/day in the months of December through March and 200,000 Dth/day in the months of July through September; (2) the price is less than or equal to NGI's Bidweek average for "Southern Cal. Bdr. Avg." plus 8.2 cents/Dth for the relevant baseload month(s); (3) the term is for the December -

³ By "cut" SoCalGas is referring to capacity reductions during over-nomination events as described in Rule No. 30, Section D.

March or the July - September periods, or any subset of those periods; and (4) the baseload contracts can only be made for one season at a time and only within the nine month period directly preceding that season. The Operational Hub shall be deemed to have made reasonable sales of such baseload gas if: (1) for baseload sales, the sale price is greater than or equal to 90% of NGI's Bidweek average for "SoCal Citygate" for the relevant baseload month(s); and (2) for spot sales, the sale price is greater than or equal to 90% of the NGI Avg Index for the relevant trading point and trading period. This provision shall expire on March 31, **2025**, unless extended by the Commission. SoCalGas may seek extension or modification of this provision by standard advice filing or application.

Protest

Anyone may protest this AL to the Commission. The protest must state the grounds upon which it is based, including such items as financial and service impact, and should be submitted expeditiously. The protest must be submitted electronically and must be received within 20 days after the date of this AL, which is May 16, 2022. Protests should be submitted to the attention of the Energy Division Tariff Unit at:

E-mail: EDTariffUnit@cpuc.ca.gov

In addition, protests and all other correspondence regarding this AL should also be sent electronically to the attention of:

Attn: Gary Lenart
Regulatory Tariff Manager
E-mail: GLenart@socalgas.com
E-mail: Tariffs@socalgas.com

Effective Date

SoCalGas asserts this AL is subject to Energy Division disposition and should be classified as Tier 2 (effective after staff approval) pursuant to General Order (GO) 96-B. Therefore, SoCalGas respectfully requests that this AL be approved on May 26, 2022, which is 30 calendar days after the date submitted.

Notice

A copy of this AL is being sent to SoCalGas' GO 96-B service list and the Commission's service list in A.18-07-024. Address change requests to the GO 96-B service list should be directed via e-mail to Tariffs@socalgas.com or call 213-244-2837. For changes to all other service lists, please contact the Commission's Process Office at 415-703-2021 or via e-mail at Process_Office@cpuc.ca.gov.

UTILITY SYSTEM OPERATION

(Continued)

PURCHASES AND SALES TO MANAGE MINIMUM FLOW SUPPLIES (Continued)

19. Should the Operational Hub deem it necessary or advisable to enter into baseload contracts for Southern System support at one or more of the Southern System receipt points, the Operational Hub shall be deemed to have made reasonable baseload purchases if: (1) the total cumulative baseload volumes at any time are less than or equal to 255,000 Dth/day in the months of December through March and 200,000 Dth/day in the months of July through September; (2) the price is less than or equal to NGI's Bidweek average for "Southern Cal. Bdr. Avg." plus 8.2 cents/Dth for the relevant baseload month(s); (3) the term is for the December-March or the July-September periods, or any subset of those periods; and (4) the baseload contracts can only be made for one season at a time and only within the nine month period directly preceding that season. The Operational Hub shall be deemed to have made reasonable sales of such baseload gas if: (1) for baseload sales, the sale price is greater than or equal to 90% of NGI's Bidweek average for "SoCal Citygate" for the relevant baseload month(s); and (2) for spot sales, the sale price is greater than or equal to 90% of the NGI Avg Index for the relevant trading point and trading period. This provision shall expire on March 31, 2025, unless extended by the Commission. SoCalGas may seek extension or modification of this provision by standard advice filing or application.
20. The Utility shall seek CPUC authority for any additional tools (other than system modifications that can be completed without an application under current rules) necessary to meet the Southern System minimum flow requirement through an application. Any contracts that are not obtained through an RFO process relating to already-approved tools (i.e., gas purchases, gas exchanges) will be submitted to the CPUC for approval by Advice Letter. Advice Letters seeking approval of the Operational Hub contractual arrangements shall identify the order in which contracts will be implemented to ensure system reliability and integrity at least cost.

ACCOUNTING TREATMENT

21. The cost and revenues of Operational Hub transactions (e.g., natural gas purchases, sales, or exchanges resulting from approved contracts) that are necessary to meet minimum flow requirements shall be recorded in the System Reliability Memorandum Account (SRMA). Prospective changes to the types of the Operational Hub natural gas transactions ("tools") to meet minimum flow requirements shall be considered in conjunction with the annual Utility Customer Forum described below.
