Advice No. 6103
(U 904 G)

Public Utilities Commission of the State of California

Subject: Revisions to Schedule Nos. G-BSS, G-LTS, and G-TBS Pursuant to Decision (D.) 09-11-006

Southern California Gas Company (SoCalGas) hereby submits revisions to its tariff Schedule Nos. G-BSS (Basic Storage Service), G-LTS (Long-Term Storage Service), and G-TBS (Transaction Based Storage Service), as shown on Attachment A.

Purpose

This compliance submittal seeks approval of the California Public Utilities Commission (Commission) to revise Schedule Nos. G-BSS, G-LTS, and G-TBS to decrease the In-Kind Energy Charge from 4.14% to 2.04%, effective April 1, 2023.

Background

In D.09-11-006, the Commission approved San Diego Gas & Electric Company's and SoCalGas' 2009 Biennial Cost Allocation Proceeding (BCAP) Phase Two Settlement Agreement (SA).¹ Section II.B.2.G (page 10) of the SA states:

The initial injection fuel rate shall be set at 2.4% for the first full storage year under this settlement commencing on April 1, 2010 and shall be adjusted for each subsequent storage year under this settlement on the basis of a three-year rolling average.

The term "initial injection fuel rate," used in the SA, is synonymous with the term "In-Kind Energy Charge," which has been used in Schedule Nos. G-BSS, G-LTS, and G-TBS.

¹ Appendix A to D.09-11-006.

On December 8, 2009, SoCalGas submitted revisions to its tariffs (including Schedule Nos. G-BSS, G-LTS, and G-TBS) with Advice No. (AL) 4047 to comply with Ordering Paragraph (OP) 4 of D.09-11-006 to implement and carry out the terms and conditions of the SA and to present the necessary tariff revisions. The revisions to Schedule Nos. G-BSS, G-LTS, and G-TBS, which also reflected the initial In-Kind Energy Charge of 2.40%, were approved by the Energy Division on January 19, 2010, and made effective April 1, 2010, for the 2010 storage year (April 1, 2010 through March 31, 2011). Subsequent advice letters submitted annually used the same Commission-approved methodology of three-year rolling average for the calculation of In-Kind Energy Charges were approved by the Commission.

In OP 18 of D.16-06-039 the Commission authorized SoCalGas to sell an *equivalent* gas compressor fuel volume in order to pay for the electricity costs of the electric compressors at SoCalGas' storage fields. The Aliso Canyon Turbine Replacement (ACTR) project was placed into service in May of 2018. Using performance data from 2022, an electric cost adjustment has now been applied, in addition to the previous three-year average rate calculation, to accommodate Southern California Edison Company's electricity bills. The adjustment uses the current forward Border price strip to anticipate the additional Dth collection requirements to pay for electricity within the 2023-2024 Storage year.

SoCalGas has determined that, on the basis of three-year rolling average, along with a new adjustment for electric compression costs, the In-Kind Energy Charge for the 2023 Storage Year (April 1, 2023 through March 31, 2024) should be 2.04%. The back-up calculations for the In-Kind Energy Charge for the 2023 storage year are shown on Attachment B. SoCalGas believes that the tariff revisions shown on Attachment A are necessary to implement the Commission's decision.
